

3. UTILIZATION OF AUTHORIZED MEDICAL ALLOWANCE LISTS AND T/E MATERIALS AND METHODS OF RE-SUPPLY

I. Objectives:

- A. Instruct medical personnel on identification and method of supply for Authorized Medical/Dental Allowance Lists (AMAL/ADAL).

II. References:

- A. Current AMAL for 635, 636, and 699.
- B. MCO 6700.2 Series, Medical and Dental (Class VIII) Material for Support of the FMF.
- C. Naval Medical Dental Material Bulletin.
- D. GruO P6000.1A.

III. Introduction:

While deployed in wartime and in peace, medical units get their supplies from AMALS and ADALS. All medical personnel should have a working knowledge of how these blocks are set up and what supplies are in them.

IV. Presentation:

A. Maintenance Responsibility:

1. The United States Marine Corps is responsible for all aspects of maintenance for all Class VIII Medical Material.

2. For 3D FSSG, this responsibility is tasked to Medical Logistics Platoon, Material Readiness Battalion. Med Log is responsible for maintenance, current inventories, dated medical material, embark packing list for deployment, equipment maintenance and annual reporting of status, with any recommended changes, to the Commandant of the Marine Corps. MCO 6700.2 gives primary guidance.

B. Configuration of blocks:

1. AMALS/ADALS are configured considering a worst case scenario of one MEF incurring 20,000 casualties in 60 days of combat.

2. Each block has a specific code. These codes identify an individual AMAL for a specific task and a logistical code for maintenance reporting. These codes include an identification code and a TAM (Table of Authorize Material) code.

3. Block break down:

<u>ID Number</u>	<u>TAM Number</u>
618-Laboratory	C-8600
619-Lab consumables	C-8604
621-Blood Bank Equipment	C-8608
624-Blood Bank Consumables	C-8610
627-Radiology Equipment	C-8614
649-Radiology Consumables	C-8658
629-Pharmacy	C-8618
630-Pharmacy Consumables	C-8620
631-SST Triage	C-8624
632-SST Consumables	C-8628

633-Acute Care Ward	C-8630
634-Acute Care Consumables	C-8634
635-Aid Station Equipment	C-8638
636-Aid Station Consumables	C-8640
637-Preventive Medicine Equipment	C-8644
638-PMU Consumables	C-8648
639-Operating Room Equipment	C-8650
640-Operating Room Consumables	C-8654
683-Med. Log. Maintenance Float	C-8680
684-Med. Log. Mission Geographic Sup.	C-8684
691-Med. Log. Test/Repair Equipment	C-8694
692-Med. Log. T/R Consumables	C-8698
699-Sick Call Block Consumables	C-8740

4. One item that has a C-TAM designation, but is not part of the AMALS, is the unit one which has a TAM number C-8570. Having knowledge of AMALS will give you a better understanding of the setup of a BAS. Each can of an AMAL block will have a packing list inside. When an AMAL is embarked and designated by the Responsible Officer (RO) will have in his possession a master copy of each packing list, and where it is embarked. AMALS in general are PWR (Pre positioned War Reserve) and are not to be expended, but can be used for training.

C. ACB (Air Contingency Battalion)

1. ACB is an infantry battalion placed on alert status in the event of an actual emergency. If necessary, the designated battalion would be transported to the specific operational area.

2. Located at Med Log are a 635 and 636 that are maintained at 100%. These AMAL blocks are not required to be inventoried and are only checked out at the time of an actual operation. The transportation of this block to the site of embarkation is the responsibility of Med Log.

3. This block is for emergencies only, and not for training.

D. Requesting AMALS

1. Requesting AMALS either for training or for a contingency will be by letter to Med Log Platoon via Health Services Support Element (HSSE). Format and content will be in accordance with GruO 6000.1.

2. Any additional items needed i.e. life pack, refrigerator, microscope, and unit 1's can be requested by an enclosure to the basic letter listing all the items. Additionally, any equipment with a unit cost of \$250.00 or greater will require an equipment custody card. Additional equipment items would also require maintenance records for scheduled PMS (preventive maintenance service) to be maintained by the using unit.

E. Inventory

1. After proper correspondence has been submitted and approved, liaison is needed with HSSE and Med Log Platoon requesting date and time for a physical inventory prior to embarking the AMAL. This physical inventory is conducted to determine the status of the AMAL and to identify any deficiencies.

2. An inventory will also be conducted after the AMAL is returned to Med Log Platoon. This inventory will determine what materials were used by the unit and any damage that the AMAL might have sustained. Any deficiency in the AMAL caused during deployment will be paid with funds from the responsible Battalion.

3. Transportation of the AMALs is the responsibility of the requesting unit. This includes transportation from Med Log and returned to Med Log after the deployment.

F. Re-supply

1. Resupply in the field during training or actual combat is the direct responsibility of a CSSD (Combat Service Support Detachment). Each unit, when requesting medical or nonmedical supplies, will follow procedures as outlined by the locally assigned CSSD.
